

NUPUR KAPOOR

DIRECTOR, STRATEGY

Nupur leads strategy for the Institute for Transformative Technologies. In her role, she focuses on identifying a pipeline of innovative technologies and developing feasible and scalable business models for commercialization in India and other geographies of focus.

Prior to ITT, Nupur was a Project Manager at Dalberg Global Development Advisors, a strategy consulting firm. During her time at Dalberg, Nupur engaged in over 50 projects with leading clients in the international development space. Her projects involved market assessment, long-term strategy development, and performance evaluation, across education, health, inclusive business, access to energy, gender and community development. In addition to this, Nupur has designed and led several management-level client workshops for a selection of early and medium stage social enterprises. Outside of projects, Nupur served as the lead for Business Development and Strategic Initiatives for Dalberg Asia in 2015.

Nupur has also spent some time in the private sector with Glocal Healthcare, an emerging rural hospital chain in West Bengal, India. She represented Glocal Healthcare's technology product portfolio with special focus on a medical diagnostic software solutions for doctors and health workers in rural settings.

Nupur holds a BA in Economics and Statistics from St. Xavier's College, along with a completed honors program in applied statistics, Mumbai and an MSc in Economics from Warwick Business School, UK.

In her personal time, Nupur enjoys yoga, all things organic, gastronomic adventures, cooking for family and friends and collecting art and artefacts through her world travels. She lives in Mumbai.
